

Metal Fabricator Apprenticeship

Level 3

42 months

Metal Fabricators create or repair structures and components from metal, working on projects like bridges, ships, machinery, and enclosures using steel joists, plates, and sheet metal.

Apprenticeship overview

Metal Fabricators work across sectors like engineering, construction, and the maritime sector, creating or repairing metal structures such as bridges, ships, oil rigs, and machinery parts. They use materials like steel, aluminium, and titanium, working with varying thicknesses and component sizes - from handheld parts to large structures. Fabricators operate in factories or on-site, either independently or in teams. They interpret technical specifications, ensure quality and accuracy, and follow strict health, safety, and environmental regulations. Daily interaction includes collaborating with supervisors, welders, designers, and other technical staff involved in the manufacturing, maintenance, and repair process.

Typical job roles

Metal Fabricator

Why choose an apprenticeship for your business?

The benefits, in brief:

- Retrain and upskill your current team
- Fill skill gaps and expand your workforce
- Diversify your team and bring in fresh ideas

Why choose us?

- We are one of the biggest apprenticeship providers in the region
- We are funding experts and can help you get the maximum benefit of government funding available to you
- We will support you as an employer and your apprentice throughout the apprenticeship journey
